Subject Index of Volume 138

Adenine complexes
  adenine N(1)-oxide complexes with metal chlorides, 55
Alcohol complexes
  effects of configuration and ring size on stability of Cu(II) chelates of amino alcohols, 155
Alkyl complexes
  preparation and characterization of new organomercury(II) selenolates, 99
Aluminum complexes
  kinetics and mechanism of Al(III)/siderophore ligand exchange; mono(deferriferrioxamine B)-Al(III) formation and dissociation in aqueous acid solution, 61
Amine complexes
  alternative HPLC method for analysing mixtures of isomeric Pt(II) diamine compounds, 171
  effects of configuration and ring size on stability of Cu(II) chelates of amino alcohols, 155
  factors stabilizing square-planar geometries in σ-bonding amine adducts; crystal and molecular structure of bis(*N*-tosyl-β-alaninato)bis-(piperidine)Cu(II), 127
Amino acid complexes
  factors stabilizing square-planar geometries in σ-bonding amine adducts; crystal and molecular structure of bis(*N*-tosyl-β-alaninato)bis-(piperidine)Cu(II), 127
  pyridoxal- and metal ion-catalyzed oxidative deamination of alpha amino acids, 231
Aminophosphoric acid complexes
  transition metal complexes of aminophosphonic acid analogues of α-alanine, β-alanine, phenylalanine and tyrosine, 25
Aminosugar complexes
  potentiometric and spectroscopic study of Cu(II), Ni(II) and Co(II) complexation by methoxy-D-glucosamine, 5
Ammonia complexes
  average cooperativity effect and site binding constants in homotropic complexes, 17
Antifungal activity
  synthesis and structural investigation of biologically active complexes of *N*-alkylphenothiazines with dioxouranium(VI), 135
Anti-inflammatory drugs
  tenoxicam complexes of Mn(II), Fe(III), Co(II), Ni(II) and Cu(II), 85
Antitumour activity
  synthesis and biological studies of steroidal *cis*-Pt(II) complexes, 249
Arsenicum compounds
  spin-echo NMR investigation of interaction of phenyldichloroarsine with glutathione in intact erythrocytes, 95

Bidentate ligand complexes
  effects of configuration and ring size on stability of Cu(II) chelates of amino alcohols, 155
  synthesis and characterization of mixed ligand complexes of Cu with nalidixic acid and (N–N) donors; crystal structure of [Cu(Phen)(Nal)-(H_2O)]$NO_3 \cdot 3H_2O$, 41
Biological activity
  synthesis and structural investigation of biologically active complexes of *N*-alkylphenothiazines with dioxouranium(VI), 135

Cadmium complexes
  differential pulse-polarographic approach to Zn(II)– and Cd(II)–DNA systems, 79
Calcium complexes
  thermodynamics of Mg and Ca complexation with AMP, ADP, ATP, 187
Carbon monoxide complexes
  O_2 and CO binding to new type of Fe(II) porphyrins, 9
Carboxylic acid complexes
  cupric complexes with 3,4-dihydroxybenzoic acid, 31
Catalysis
  pyridoxal- and metal ion-catalyzed oxidative deamination of alpha amino acids, 231
Charge-transfer
  Mg cation-perturbed charge-transfer interactions, 13
Chelate complexes
  effects of configuration and ring size on stability of Cu(II) chelates of amino alcohols, 155
  ^{31}P and ^{23}Na NMR and Tb(III) luminescence study of bistriphosphato–lanthanide(III) complexes including cation shift reagent $[Dy(PPP)_2]^{7-}$, 241
  synthesis and characterization of mixed ligand complexes of Cu with nalidixic acid and (N–N) donors; crystal structure of [Cu(Phen)(Nal)-(H_2O)]$NO_3 \cdot 3H_2O$, 41
Chelate ligand complexes
  decrease solubilisation of ferritin Fe and fresh Fe(III) precipitate following repeated chelator treatments, 35

© Elsevier Sequoia/Printed in The Netherlands

development of Fe chelators for Cooley's anemia, 215
effect of kinetic factors on thermodynamic evaluations of therapeutic chelating agents, 67
Chromium complexes
Cr(III) interactions with nucleotides, 105
Cobalt complexes
average cooperativity effect and site binding constants in homotropic complexes, 17
some new complexes of Co(III) with hypoxanthine, inosine and purine nucleotides, 199
potentiometric and spectroscopic study of Cu(II), Ni(II) and Co(II) complexation by methoxy-D-glucosamine, 5
tenoxicam complexes of Mn(II), Fe(III), Co(II), Ni(II) and Cu(II), 85
Cooley's anemia
development of Fe chelators for, 215
Copper complexes
binding of Cu(II) and Mn(II) to 9-methylpurine studied by NMR and potentiometric titration, 49
Cu–Mo antagonism in ruminants; reaction of thiomolybdate ions with proteins and metalloproteins, 103
cupric complexes with 3,4-dihydroxybenzoic acid, 31
effects of configuration and ring size on stability of Cu(II) chelates of amino alcohols, 155
factors stabilizing square-planar geometries in σ-bonding amine adducts; crystal and molecular structure of bis(*N*-tosyl-β-alaninato)bis-(piperidine)Cu(II), 127
further studies on synthetic dicopper(I) oxygen carrier and comparison with hemocyanin, 121
interaction of thiols with Cu(II); ESR study, 175
oxidation–reduction potential of Cu–bleomycin, 75
potentiometric and spectroscopic study of Cu(II), Ni(II) and Co(II) complexation by methoxy-D-glucosamine, 5
reactions of ascorbate and hydrogen peroxide with hemocyanin from Taiwan snails and comparison with synthetic dicopper(I) oxygen carrier, 11
Redox behaviour and stability of active centre analogues of Cu_2Zn_2-superoxide dismutase, 163
synthesis and characterization of mixed ligand complexes of Cu with nalidixic acid and (N–N) donors; crystal structure of $[Cu(Phen)(Nal)(H_2O)]NO_3 \cdot 3H_2O$, 41
tenoxicam complexes of Mn(II), Fe(III), Co(II), Ni(II) and Cu(II), 85
Crystal structure(s)
of bis(*N*-tosyl-β-alaninato)bis(piperidine)Cu(II), 127
of $[Cu(Phen)(Nal)(H_2O)]NO_3 \cdot 3H_2O$, 41
Cyanide complexes
study by ^{13}C NMR and by EPR of reactions between nitroprusside ion and haemoglobins, 159
Cytotoxicity
spin-echo NMR investigation of interaction of phenyldichloroarsine with glutathione in intact erythrocytes, 95

Dehydrogenase
V inhibition of yeast glucose-6-phosphate dehydrogenase, 179
Dinuclear complexes
further studies of synthetic dicopper(I) oxygen carrier and comparison with hemocyanin, 121
Dioxouranium complexes
synthesis and structural investigation of biologically active complexes of *N*-alkylphenothiazines with dioxouranium(VI), 135
DNA complexes
differential pulse-polarographic approach to Zn(II)– and Cd(II)–DNA systems, 79
Drug complexes
interaction of trifluoperazine with S100 protein; ^{19}F NMR study, 145

Electrochemistry
binding of Cu(II) and Mn(II) to 9-methylpurine studied by NMR and potentiometric titration, 49
differential pulse-polarographic approach to Zn(II)– and Cd(II)–DNA systems, 79
oxidation–reduction potential of Cu–bleomycin, 75
potentiometric and spectroscopic study of Cu(II), Ni(II) and Co(II) complexation by methoxy-D-glucosamine, 5
Enzyme complexes
ammonium metavanadate complexation with glutathione disulfide; contribution to inhibition of glutathione reductase, 91
V inhibition of yeast glucose-6-phosphate dehydrogenase, 179

Ferredoxin
formation of bis(μ-methanethiolato)bis(dinitrosyliron) from parsley ferredoxins and nitrite, 15
Ferritin complexes
decrease solubilisation of ferritin Fe and fresh Fe(III) precipitate following repeated chelator treatments, 35

Haemoglobin complexes
study by ^{13}C NMR and by EPR of reactions between nitroprusside ion and haemoglobins, 159

Hemocyanin complexes
further studies of synthetic dicopper(I) oxygen carrier and comparison with hemocyanin, 121
reactions of ascorbate and hydrogen peroxide with hemocyanin from Taiwan snails and comparison with synthetic dicopper(I) oxygen carrier, 11
Hydrogen bonding
cation binding effect on H bonded dimer of imidazole and water, 131

Imidazole complexes
cation binding effect on H bonded dimer of imidazole and water, 131
reactions of Os tetroxide with imidazoles, 113
Iron complexes
decrease solubilisation of ferritin Fe and fresh Fe(III) precipitate following repeated chelator treatments, 35
development of Fe chelators for Cooley's anemia, 215
formation of bis(μ-methanethiolato)bis(dinitrosyliron) from parsley ferredoxins and nitrite, 15
Mössbauer and spectroscopic studies on substituted tetraphenylporphyrinato Fe(III) complexes in aqueous solutions and formation of μ-oxo-bridged species, 205
O_2 and CO binding to new type of Fe(II) porphyrins, 9
preparation and characterization of first disulphidothionitrato metalloporphyrin in complex; disulphidothionitrato(*meso*-tetraphenylporphinato)Fe(III), 169
study by ^{13}C NMR and by EPR of reactions between nitroprusside ion and haemoglobins, 159
tenoxicam complexes of Mn(II), Fe(III), Co(II), Ni(II) and Cu(II), 85

Kinetics and mechanism
of Al(III)/siderophore ligand exchange; mono-(deferriferrioxamine B)Al(III) formation and dissociation in aqueous acid solution, 61
average cooperativity effect and site binding constants in homotropic complexes, 17
cupric complexes with 3,4-dihydroxybenzoic acid, 31
effect of kinetic factors on thermodynamic evaluations of therapeutic chelating agents, 67
effects of configuration and ring size on stability of Cu(II) chelates of amino alcohols, 155
reactions of Os tetroxide with imidazoles, 113
study of complex formation between differently charged free-base porphyrins and Sm porphyrins, 139
V inhibition of yeast glucose-6-phosphate dehydrogenase, 179

Lanthanide complexes
^{31}P and ^{23}Na NMR and Tb(III) luminescence study of bistriphosphato–lanthanide(III) complexes including cation shift reagent $[Dy(PPP)_2]^{7-}$, 241
Lithium complexes
cation binding effect on H bonded dimer of imidazole and water, 131
Luminescence
^{31}P and ^{23}Na NMR and Tb(III) luminescence study of bistriphosphato–lanthanide(III) complexes including cation shift reagent $[Dy(PPP)_2]^{7-}$, 241

Magnesium
Mg cation-perturbed charge-transfer interactions, 13
Magnesium complexes
thermodynamics of Mg and Ca complexation with AMP, ADP, ATP, 187
Manganese complexes
binding of Cu(II) and Mn(II) to 9-methylpurine studied by NMR and potentiometric titration, 49
tenoxicam complexes of Mn(II), Fe(III), Co(II), Ni(II) and Cu(II), 85
Mercury complexes
preparation and characterization of new organomercury(II) selenolates, 99
Metal complexes
adenine N(1)-oxide complexes with metal chlorides, 55
aggregation of metallo-β-oxoporphyrins, 1
effect of kinetic factors on thermodynamic evaluations of therapeutic chelating agents, 67
pyridoxal- and metal ion-catalyzed oxidative deamination of alpha amino acids, 231
transition metal complexes of aminophosphonic acid analogues of α-alanine, β-alanine, phenylalanine and tyrosine, 25
Metalloporphyrin complexes
preparation and characterization of first disulphidothionitrato metalloporphyrin in complex; disulphidothionitrato(*meso*-tetraphenylporphinato)Fe(III), 169
study of complex formation between differently charged free-base porphyrins and Sm porphyrins, 139
Metalloprotein complexes
Cu–Mo antagonism in ruminants: reaction of thiomolybdate ions with proteins and metalloproteins, 103
Molybdenum complexes
Cu–Mo antagonism in ruminants: reaction of thiomolybdate ions with proteins and metalloproteins, 103

Nickel complexes
average cooperativity effect and site binding constants in homotropic complexes, 17
potentiometric and spectroscopic study of Cu(II), Ni(II) and Co(II) complexation by methoxy-D-glucosamine, 5
tenoxicam complexes of Mn(II), Fe(III), Co(II), Ni(II) and Cu(II), 85
Nitrosyl complexes
formation of bis(μ-methanethiolato)bis(dinitrosyl-iron) from parsley ferredoxins and nitrite, 15
Non-steroidal ligand complexes
tenoxicam complexes of Mn(II), Fe(III), Co(II), Ni(II) and Cu(II), 85
Nucleic acid complexes
binding of Cu(II) and Mn(II) to 9-methylpurine studied by NMR and potentiometric titration, 49
Nucleotide complexes
Cr(III) interactions with nucleotides, 105
some new complexes of Co(III) with hypoxanthine, inosine and purine nucleotides, 199
thermodynamics of Mg and Ca complexation with AMP, ADP, ATP, 187

Osmium complexes
reactions of Os tetroxide with imidazoles, 113
Oxidation
pyridoxal- and metal ion-catalyzed oxidative deamination of alpha amino acids, 231
reactions of Os tetroxide with imidazoles, 113
Oxide complexes
adenine N(1)-oxide complexes with metal chlorides, 55
reactions of Os tetroxide with imidazoles, 113
Oxygen complexes
further studies of synthetic dicopper(I) oxygen carrier and comparison with hemocyanin, 121
O_2 and CO binding to new type of Fe(II) porphyrins, 9

Peptide complexes
oxidation–reduction potential of Cu–bleomycin, 75
Peroxide complexes
reactions of ascorbate and hydrogen peroxide with hemocyanin from Taiwan snails and comparison with synthetic dicopper(I) oxygen carrier, 11
Phenol complexes
cupric complexes with 3,4-dihydroxybenzoic acid, 31
Platinum complexes
alternative HPLC method for analysing mixtures of isomeric Pt(II) diamine compounds, 171
synthesis and biological studies of steroidal *cis*-Pt(II) complexes, 249
Polydentate ligand complexes
^{31}P and ^{23}Na NMR and Tb(III) luminescence study of bistriphosphato–lanthanide(III) complexes including cation shift reagent $[Dy(PPP)_2]^{7-}$, 241
Porphyrin complexes
aggregation of metallo-β-oxoporphyrins, 1
Mössbauer and spectroscopic studies on substituted tetraphenylporphyrinato Fe(III) complexes in aqueous solutions and formation of μ-oxo-bridged species, 205
O_2 and CO binding to new type of Fe(II) porphyrins, 9
study of complex formation between differently charged free-base porphyrins and Sm porphyrins, 139
Protein complexes
Cu–Mo antagonism in ruminants; reaction of thiomolybdate ions with proteins and metalloproteins, 103
interaction of trifluoperazine with S100 protein; ^{19}F NMR study, 145

Quartz
surface chemistry of crushed quartz dust in relation to its pathogenicity, 193

Redox reactions
oxidation–reduction potential of Cu–bleomycin, 75

Samarium complexes
study of complex formation between differently charged free-base porphyrins and Sm porphyrins, 139
Schiff base complexes
Redox behaviour and stability of active centre analogues of Cu_2Zn_2-superoxide dismutase, 163
Selenium complexes
preparation and characterization of new organomercury(II) selenolates, 99
Serum albumin complexes
determination and characterization of V in serum albumins, 149
Siderophore complexes
kinetics and mechanism of Al(III)/siderophore ligand exchange; mono(deferriferrioxamine B)-Al(III) formation and dissociation in aqueous acid solution, 61
Steroid complexes
synthesis and biological studies of steroidal *cis*-Pt(II) complexes, 249
Sulfur complexes
formation of bis(μ-methanethiolato)bis(dinitrosyl-iron) from parsley ferredoxins and nitrite, 15
Superoxide dismutase complexes
Redox behaviour and stability of active centre analogues of Cu_2Zn_2-superoxide dismutase, 163

Theoretical study
cation binding effect on H bonded dimer of imidazole and water, 131
Thermodynamics
of Mg and Ca complexation with AMP, ADP, ATP, 187
Thiazine complexes
synthesis and structural investigation of biologically active complexes of *N*-alkylphenothiazines with dioxouranium(VI), 135
Thiol complexes
interaction of thiols with Cu(II); ESR study, 175
Toxicity
preparation and characterization of new organomercury(II) selenolates, 99
surface chemistry of crushed quartz dust in relation to its pathogenicity, 193

Vanadium complexes
ammonium metavanadate complexation with glutathione disulfide; contribution to inhibition of glutathione reductase, 91
determination and characterization of V in serum albumins, 149
V inhibition of yeast glucose-6-phosphate dehydrogenase, 179
Vitamin complexes
pyridoxal- and metal ion-catalyzed oxidative deamination of alpha amino acids, 231

Water complexes
cation binding effect on H bonded dimer of imidazole and water, 131

Zinc complexes
differential pulse-polarographic approach to Zn(II)– and Cd(II)–DNA systems, 79
Redox behaviour and stability of active centre analogues of Cu_2Zn_2-superoxide dismutase, 163
